

As an Assistant Section Emergency Coordinator for W TN, I find that WT Docket 04-140 will be very helpful to the amateur radio service. Auxiliary stations on 2 meters will promote use of VOIP technologies to aid disaster situations. HF amplifiers for the amateur service will permit law-abiding hams to operate without undue burden to the power limits of their current privileges without undue burden of constructing their own equipment.
Sincerely,

Ken Rogers, AF4ZR
